

# The Collaborator

News from the IChemE Safety Centre | Issue 22 | March 2020

## Welcome

Welcome to the twenty second issue of The Collaborator. The new year is now well and truly underway with many activities, conference and networking events planned.

We have signed up a new operating partner, Jemena, Water Corporation WA, with several other companies expressing interest in joining.

If you have any feedback or comments on the content of this newsletter or are interested in being on the mailing list, please contact me via [safetycentre@icheme.org](mailto:safetycentre@icheme.org)

## What we have been up to...

At the November Advisory Board meeting last year, it was decided to launch a new initiative to supply ISC members with a regular supply of social media ready pieces of information on a variety of topics and develop a calendar with a reminder of an anniversary or a key learning. These are sent out in advance to all ISC members, please feel free to use these videos in your workplace to raise awareness.

Zsuzsanna attended the HazardEx 2020 Conference in Harrogate where she gave a presentation on "Further down the rabbit hole – detailed measurement for lead process indicators on barrier failures".

## What's next...

The next edition of Safety Lore will focus on learnings from Permit to Work. This will be free to download from the ISC website in English or Spanish as well as podcast. If you have any comments or wish to propose a topic, please contact us at [safetycentre@icheme.org](mailto:safetycentre@icheme.org)

I continue to produce a series of podcasts named Process Safety with Trish and Traci from Chemical Processing magazine. They discuss current process safety issues offering insight into mitigation options and next steps. The podcasts are available to download [here](#). The latest podcast discusses Inherently Safer Design.

I will visit several ISC member companies in New Zealand this month and will be giving a Breakfast Briefing on Cyber Security on 20 March in New Plymouth. If you are in the area and would like to attend, please contact Tracey Abraham at [safetycentre@icheme.org](mailto:safetycentre@icheme.org) to book your place.

The Centre is currently working on a roadmap of resources which will be posted to the ISC website later in 2020.

The Safety Centre will be exhibiting at the 2020 AIChE Spring Meeting and 16<sup>th</sup> Global Congress for Process Safety in Houston from 29 March until 1 April. We are giving away a case study, if you are attending, please visit us at Booth #124. I will be giving two presentations

## New Guidance document

Look out for the new guidance document "Framing of Process Safety Management in early phase projects" which was endorsed by the Advisory Board last month. This will be uploaded to the ISC website to download next month.
