

## Student Food and Drink Project Prize

- two prizes of £250 GBP awarded each year
- open to students on IChemE accredited bachelor's or master's programmes

This prize aims to promote and recognise interest in food and drink processing amongst students taking an IChemE accredited undergraduate programme. The prize is awarded to students who have completed either a design or research project on a topic related to food and drink processing as part of their course. There are up to two prizes of £250 awarded each year, as determined by the funds available. Prize money may be split if applications have equal merit or may be split between design and research focused projects. The prize is sponsored by Pentadel Project Management, which manages innovation for clients across the food and drink industry, and is also a proud recruiter of bright, talented IChemE graduates.

### How is the winner decided?

Assessors from the Food and Drink Special Interest Group committee will consider the novelty of the project, the relevance to food and drink processing, the quality of the work reported and the standard of reporting. With regard to the quality of the work, the assessors will consider the nature of the project, such as bachelor/master's level, the number of students working together, the project duration and the percentage of the year's credits associated with project.

### To enter

Download and complete the application form at [www.icheme.org/food-drink-ug-prize](http://www.icheme.org/food-drink-ug-prize) and submit to [specialinterestgroups@icheme.org](mailto:specialinterestgroups@icheme.org) before 31 December.
