Where chemical engineering can take you...

Environmental engineer - Petroleum engineer - Chemical engineer - Nuclear engineer - Biomedical engineer - Biotechnologist - Chemical processing - Manufacturing engineering - Process engineer - Energy engineer - Food engineer - Materials engineer - Chemical plant operator - Fuels engineer - Mining Engineer - Plastics Engineer - Process designer - Product Development Engineer - Research and development - Consultant and more...

Try researching these companies to look for apprenticeships.

Remember the name of the apprenticeship can vary.

- ✓ Search by interest or location
- ✓ Look up engineering and manufacturing
- ✓ Competition is high, so do your research

To accompany the IChemE webinar *Apprenticeship routes into chemical engineering*, February 2025. Availability of apprenticeships may change over time, so always check the relevant website for up-to-date information.
