

## What's New in Fluid Separations?

A one-day research event organised by the Fluid Separations Special Interest Group

**Davis Building, Institution of Chemical Engineers  
Railway Terrace, Rugby, CV21 3HQ, UK**

**Friday 27 June 2025, 09:30 – 16:30**

## Call for Contributions

This one-day symposium aims to showcase new developments and promote interactions within the fluid separations community. We welcome contributions from PhD students and early-career academic and industrial researchers working in areas relevant to the engineering of fluid separations. Come and tell members of the community about your innovative work on separation processes – from distillation, absorption and extraction, to adsorption, membrane separations, filtration, and chromatography. Share how your work on separation and bioprocess technologies contributes to sustainable processes and products, for example, involving CO<sub>2</sub> capture, ammonia, hydrogen or methane production, or advanced storage solutions.

Researchers selected to contribute will be invited to give a 20–25 minute presentation to an audience from industry and academia, including other early-career researchers. Experienced members from industry and academia will evaluate the presentations and give general feedback. The event will give participants a chance to discover diverse and exciting current research work, and will provide opportunities for networking and discussions during coffee breaks and over lunch. The event will close with a celebratory networking gathering where prizes totalling up to £600 will be awarded for the best presentations by IChemE members. IChemE members who present their work, and whose travel (with the minimum feasible rail fare) from their university town to Rugby costs over £25, may claim up to £100 towards their travel costs from IChemE.

*Not a member?* Find out more here <https://www.icheme.org/membership/membership-grades/>. Full-time postgraduate students are eligible for free membership: [Postgraduate students](#). Register to join IChemE here: [Student Member - How to apply - IChemE](#)

If you wish to present your research at the event, please submit a synopsis of your talk (maximum 300 words) by **Sunday 8 June 2025** <https://forms.office.com/e/5AAh67z8Lc>. You will be notified by **10 June** whether your presentation will be included in the day's programme.

Register your interest in attending the event using the link on the event web page by **19 June**: [Here](#)
